DETAILED ACTION

Drawings

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, as stated in claim 10, "an inspection apparatus head unit moving device" and its details as claimed must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

2. It is suggested that the phrase "an inspection apparatus" be changed to "a magnetic tape drive". This title would conform to Fig 7 that contains a "head unit moving

device". It is also suggested in the first sentence of the claim that a reference is made to "the method of claim 1". Lastly, it is suggested that the term "comprising" be used in place of the phrase "which is equipped with".

Claim Rejections - 35 USC § 112

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claim 10 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. There is no support for "an inspection apparatus head unit moving device that according to claim 1 includes all details such as a device reel, device reel driving device, a tape reel and head unit, an optical sensor, and other elements set out in claim 10. A magnetic tape drive is shown in Fig 7. It is suggested that the phrase "an inspection apparatus" be changed to "a magnetic tape drive". This title would conform to Fig 7 that contains a "head unit moving device". It is also suggested in the first sentence of the claim that a reference is made to "the method of claim 1". Lastly, it is suggested that the term "comprising" be used in place of the phrase "which is equipped with".

Allowable Subject Matter

4. Claims 1-9, 11-17 and 23-30 are allowed as the prior art does not teach or suggest the applicant's invention. Reasons for allowance for independent claims 1-3 were provided in the Office Action dated 6/23/06.
